

###///-----///##

Alt OS to get rid of Iptables and Systemd crap for Pfsense:

curl url | zxcata | >>/dev/sdx ; lzma -d file.lzma ; clear ;

Install Instructions: gparted ; // fdisk -l ; // xzcat ;

# fdisk -l ; // xzcat nomadbsd-1.3.2.i386.img.lzma >>/dev/sdx ;

###///-----///##

Links - 32 bit is sometimes preferred because x86x64 is MSIL:

The Other Alt OS I do not prefer is Ghost BSD on [ghostbsd.org](https://ghostbsd.org):

Not to be biased or anything, I just have had the Beep of Death

with sending data through an IO bus and it literally blew speakers.

Linux never did the beep of death on me, esp Anti-Systemd ones.

Install with cat / dd if=file >>/dev/sdx or dd if=.iso

of=/dev/sdx bs=4M ;
